

Traditional Detection vs Seg-to-Det Pipeline

Best Detection Approach
per Paradigm

Paradigm Comparison

	Traditional Detection	WoundSHoT Seg-to-Det
Training	Detection-specific loss + labels	Segmentation masks (reused)
Architecture	Anchor/query-based detection head	Connected components on seg output
AP@0.5	91.22%	96.23%
Extra Params	Full detector (25-32M)	Zero (uses seg output)
